No More Excuses

The way children learn has and is changing in today's electronic world. Perhaps it started many years ago with Sesame Street, which began the practice of teaching in limited segments, only expecting children to pay attention for short periods of time. Certainly, the change continued with computer games, email, social networks, texting and tweeting. Learning from this, we educators in the schools are using technology in the classroom at increased rates.

One of the ways that parents can help is by insuring that their children do their homework, study and review. A problem for parents, especially when the child goes into higher levels of math and science, is that they either forgot or never took these courses and can't help their child accomplish the necessary work at home. Well, this book is a developing product to end that excuse. The computer has come to the rescue. There are numerous reliable and safe internet sites devoted to teaching the very skills and courses your child takes during the school day. We are happy to share a variety of these sites with you, and provide specific instructions on how to use a couple of the more important sites. We have grouped these sites by specialty/subject area and when there is an electronic textbook available, have provided that as well. The better sites have videos of teachers providing the review of skills and most have plenty of practice questions and tests with answers and solutions as part of the review. No more excuses by either the parent or student on not knowing how to solve the problem or do the work!!!

We hope you use this book as a kick-off to spend quality time with your child on improving knowledge and study skills. The resources cited will grow over time. If you come across a good resource, please share it with us. Thanks to the guidance counselors, especially Barbara Madigan, for beginning this idea and updating the resources, and to all of the Valley Stream Central High School District chair people for sharing their information so that we could share them with you.
