

# VSCHSD HP Laptop Setup Directions

Scan the QR Code for video

Follow the directions below:

1. First, plug in the power adapter and start charging the laptop then open the lid on your new laptop and turn it on with the power button on the left side of the device to Start the setup process.  
Select your region, **United States** should already be selected, click "Next" or "Yes".
2. Next, you will select the "US" keyboard layout, then click "Next". When it asks you to select a second keyboard layout, click "Skip" (a second layout can be added later).
3. Now you'll need to connect your device to the internet.  
This process differs slightly if you're setting up your device at home vs at school.  
**3A. From School:**  
Select "VS-WiFi network" and click "Connect". You will be prompted for your VSCHSD username and password, enter them and click "Connect" then click "Next".  
**3B. From Home:**  
Select your home wireless network and click "Connect". If you have a password, you will be prompted to enter it. Now click "Connect" or Next ".  
Your computer may need to restart after this step.
4. Now enter your full school email address.  
Ex.(username@vschsd.org) and click "Next", then enter your password, and hit "Next" again.

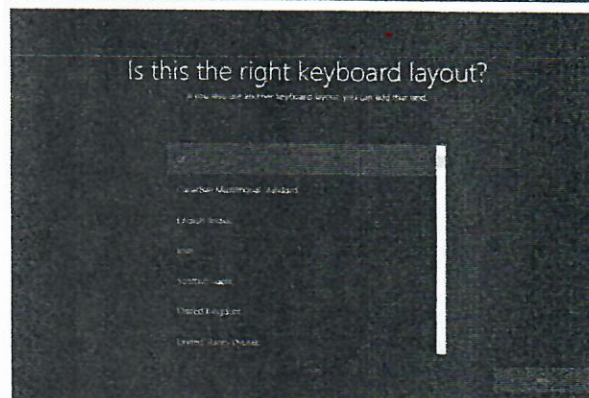

Your device will begin to provision, this will include downloading apps and updates, and setting up your account on your new laptop. This part may take a while.

Once the lock screen appears, you are ready to start using your new laptop!

After you login for the first time some apps may still be installing in the background, so we suggest leaving it on for a little bit and let it finish up.

## Other Tips:

- In the Start Menu, you will find two places you can download apps, the Microsoft Store and the Company Portal. If you need any apps for class, or for fun, this is where you'll find them.
- Update your laptop about once a month  
Go to: Settings> Updates & Security and use Windows Update to update your computer. Since it's new, it's going to need several updates.
